

I am a long time listener of XM and will take it as a grave attack on my civil liberties to choose myself what I want to listen to and what I do .I feel like so many Americans that are liberties are under attack by many SPECIAL ineterst groups there are many formes of terrorizm some of which starts at home .Please do not allow these groups to change or regulate what is working and being driven by the consumer ;which in our form of government is the ultimate voice for the American public . Please dont silence that right to Special interests.thks
